

FLYTE

COOP & RUN SANITISING POWDER

Scented with citronella this environmentally friendly, non-hazardous sanitising powder & DEFRA approved disinfectant reduces ammonia and inhibits bacterial growth. With its added Yucca, Seaweed and Essential Oils, it is super absorbent and aids in prolonging bedding life.

Flyte Coop & Run Sanitising Powder is a new generation litter conditioner to meet the needs of modern farming. Containing yucca, seaweed and essential oils, chosen for their moisture-absorbing, anti-bacterial and insect-repellent properties, with the addition of Halamid, a Defra-approved disinfectant. Flyte Coop & Run Sanitising Powder can be spread directly on litters of all types in order to reduce soiling, moisture and odour. It improves hygiene, reduces odour and extends the time between clean-outs. Flyte Coop & Run Sanitising Powder is an excellent combatant of ammonia. Flyte Coop & Run Sanitising Powder will absorb at least 1.5 times its own weight in liquid and does not become muddy or slippery when wet. No need to mix into the bedding - it will quickly spread itself through all types of litter. Flyte Coop & Run Sanitising Powder does NOT contain phosphates.

INSTRUCTIONS FOR USE:

Poultry: 50g/sq.m every 2-3 weeks or as required - especially around drinkers or any fouled areas.

Pigs: Sows: 65g/day in gestation behind the sow and in the farrowing area. **Gilts:** 100g/day for straw and wood-shaving litter **Farrowing:** Top dress Flyte Coop & Run Sanitising Powder in the pens and on the heat mats before farrowing.
